Thanks for continuing to promote the services of poison centers, Patrick.

I believe I can speak for all in saying that we stand ready to help in any way we can.

Scott

All,

Telephone calls going to the Poison Control Center has tapered off dramatically. What can we do to advertise better to the impacted communities to let them know this is a resource? We will have questions concerning vectors, occupational exposure, heat exhaustion, possible food and water borne illness, carbon monoxide, biting insects; first aid issues. Other ideas/thoughts?

Can the Texas Poison Control Center develop a one-page FAQ on questions they can address to key environmental health issues that revolve around flood related health concerns? Coordinated with TCEQ and TDSHS? When done, I can share with recovery folks at FEMA for broad global sharing. I think people don't realize that PCC can offer so much more, than just poisoning support. Please advise.

FYI- I am the subject matter expert in Austin, Texas located with HHS recovery experts. I will be here for 2 week and this is a perfect time to enhance PCC capabilities. Our primary point of contact is Dr. David Baker. He will be the primary point to lead discussion. I am sending this out for broader awareness. Any ideas or thought should be shared with Dr. Baker.

Respectfully,

From: Baker, David [<mailto:David.Baker@BSWHealth.org>]
